Die Casting Machine

BD-V5 EXseries

Customer's Value Up

A Hitachi Group Company

Die Casting Machine

BD-V5 EXseries

High-end Die-casting Machine
Employing Renovated Control
Based on the Proven BD-V Series

The Latest Control SYSTEM 500

High-cycle compound movement.

(compound movement of peripheral devices is a standard feature)

Only Toyo offers an integrated system design that includes peripheral equipment.

■ Low injection speed
0.03~1.0m/s
BD-1250V5 EX : 0.05~0.7m/s

■ High injection speed
1.0~9.0m/s
BD-900V5 EX・BD-1250V5 EX : 1.0~8.0m/s

■ Sharp acceleration capability
7 m/s/0.01s (70G)

maximum 9 point setting

M

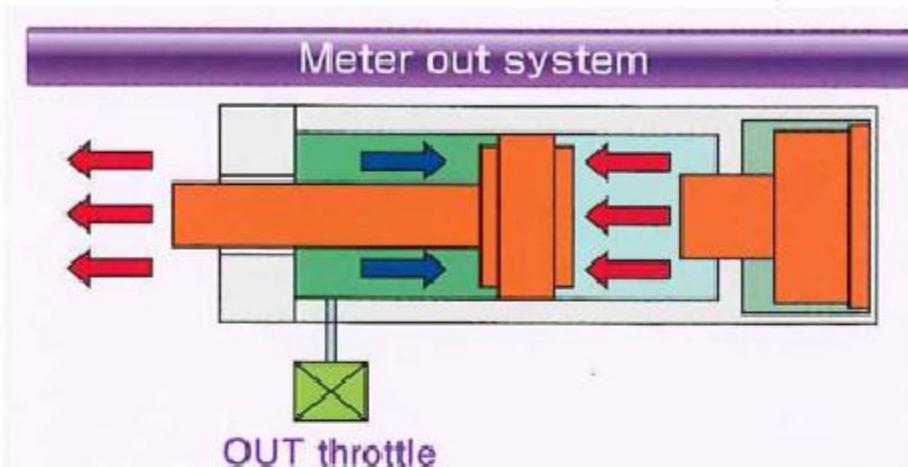

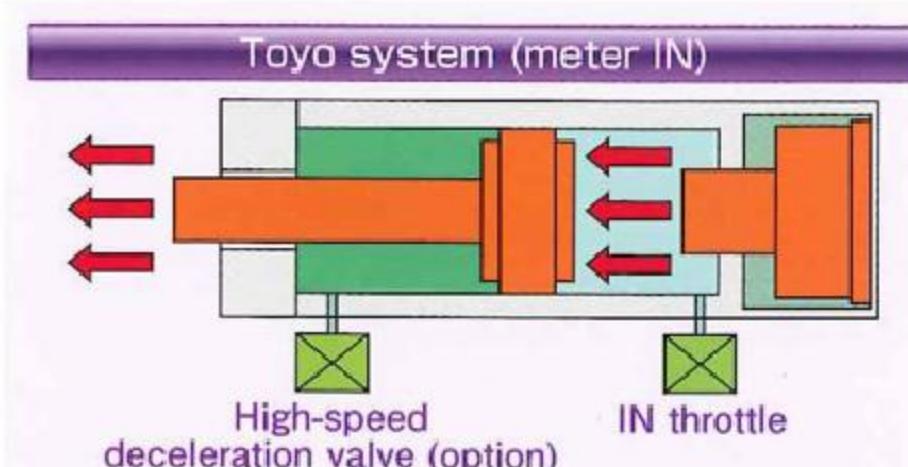

ulti Injection System

Accurate injection at will,
from super-low speed to super-high speed.

This system aims at feeding molten metal in its active state into the die, while achieving super-low and super-high speeds. To accomplish this feat as only Toyo could, we gathered our ideas and know-how backed by our familiarity of every possible casting condition to create a unique system called the new multi-injection system.

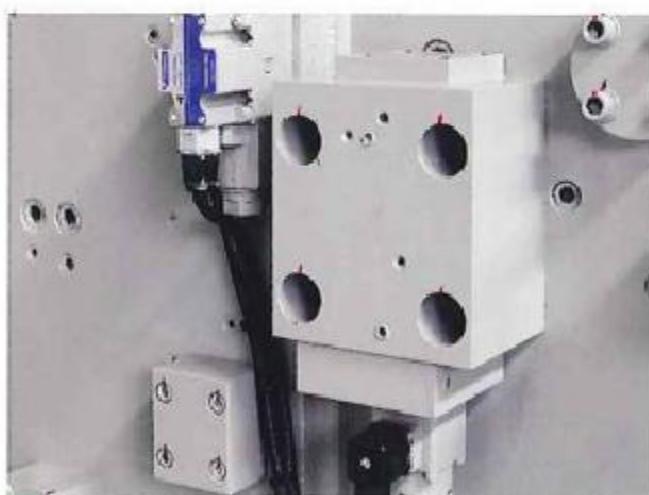

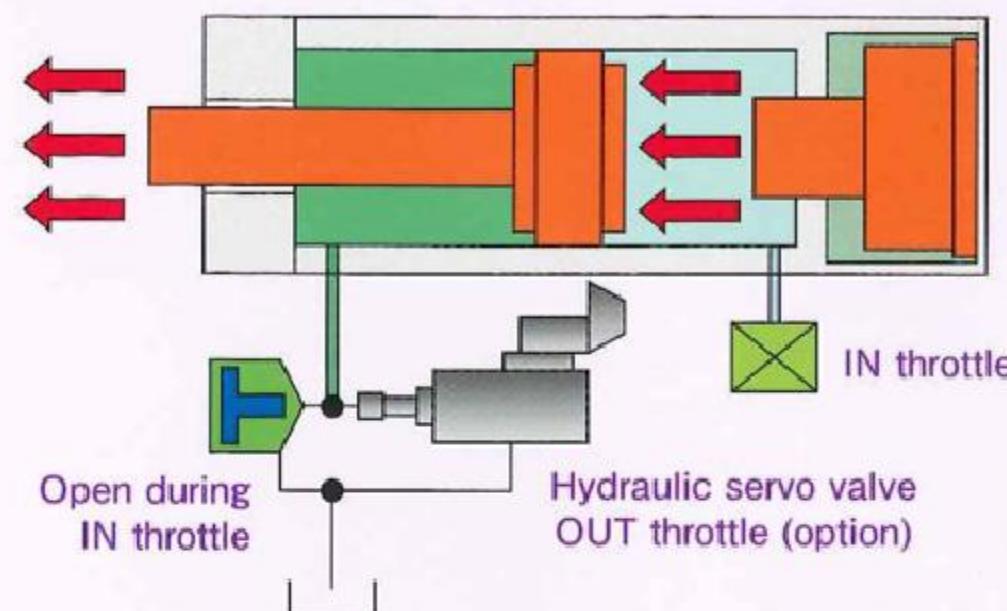

Features

- 1. Equipped with a dedicated EH valve for low speed use - Improved stability in the super-low speed range**
- 2. Made the dedicated EH valve for low speed use compact - Improved speed response**
- 3. Can be equipped with a hydraulic servo valve (option)**
 - ① Improved deceleration stability in the high-speed deceleration function
 - ② Speed control selection possible in the high-speed range (meter-in, meter-out selection possible)
 - ③ Multi-stage (maximum 5 points) injection possible in the high-speed range

● New injection system

Meter-IN, Meter-OUT(selectable)

Low speed EH valve

Exerts powers during ultra-low speed casting.
Realizes ultra-low speed stability.

Hydraulic servo valve (option)

Exerts powers in the high-speed injection range.
Realizes improved deceleration stability.
Realizes speed control selection.

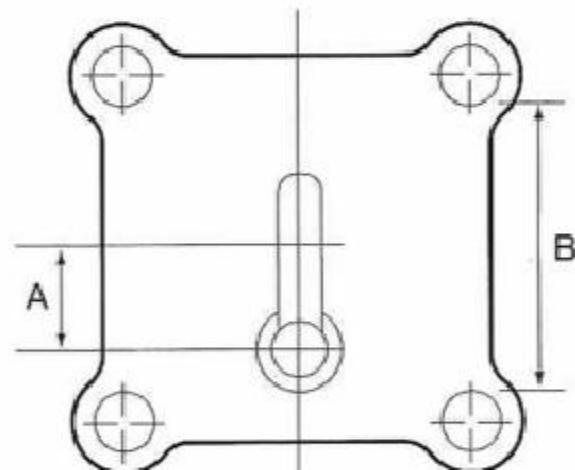

Electric injection flow control valve

Effects remote control of the injection speed adjustment.
Also automatically corrects speed and pressure rise time.

C

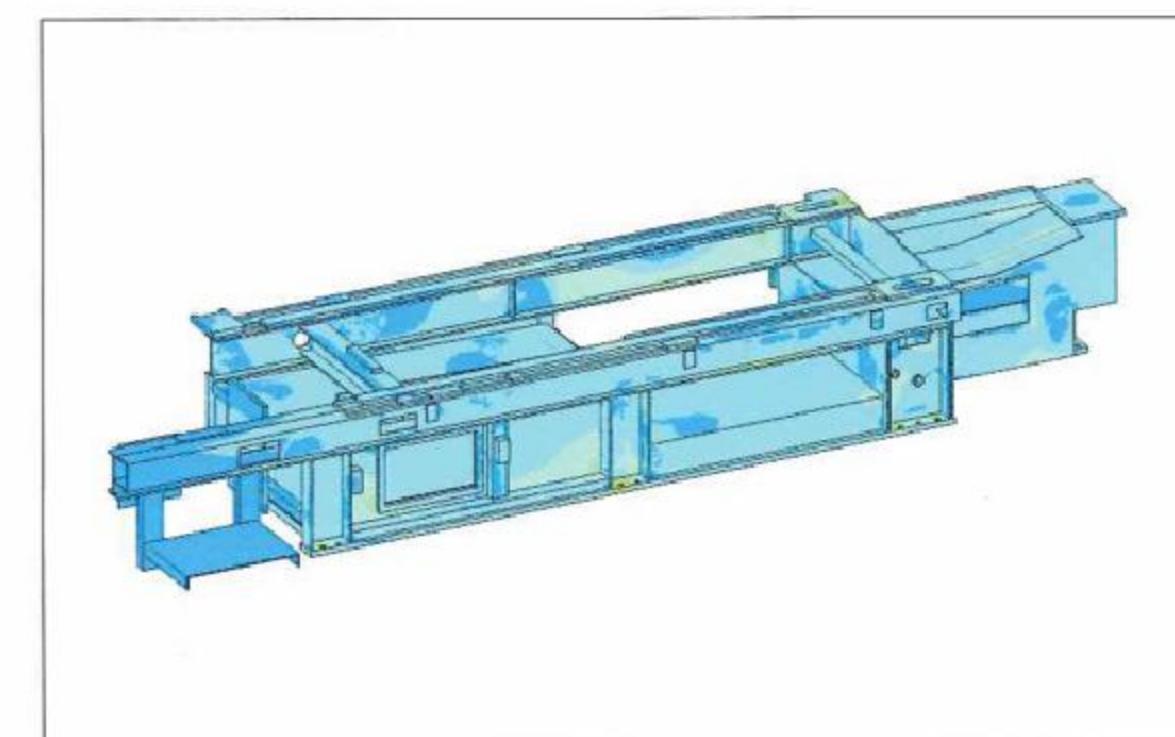

lamping System

The high-precision, high-rigidity die clamping unit can be handled one size larger die mold.

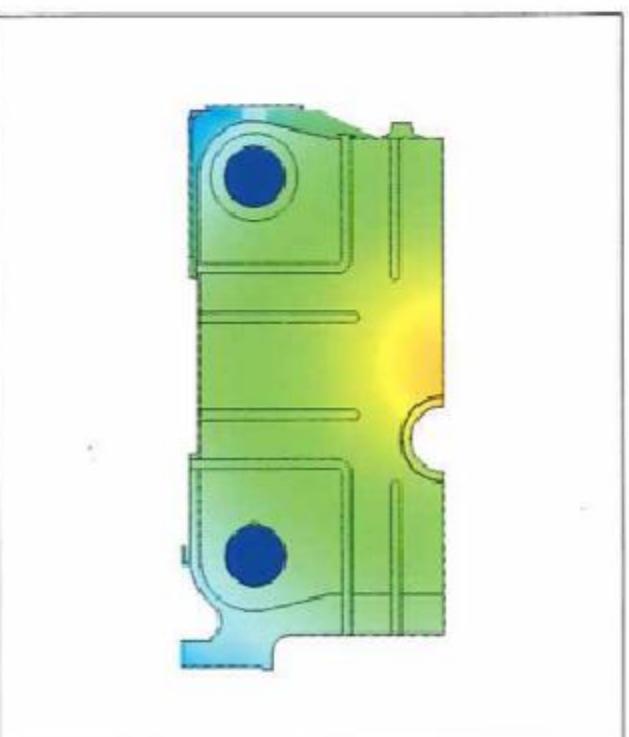

The rigidity of the tail stock, the criteria that determines the precision of the die mount and toggle, has been increased, thus achieving high-precision, high-rigidity clamps. Furthermore, the dimension between platen center and injection position has been increased to handle dies of one size larger model.

	BD-350	BD-500	BD-650	BD-800	BD-900	BD-1250
A	125→150	150→175	175→225	250→275	250→275	350
B	530→652	660→748	750→852	850→941	850→931	1150

High rigidity machine frame

- Highly rigid machine frame optimally designed with CAE analysis.
- High rigidity machine frame sustains rigorous die opening and closing motions and assures stable operation.
- Tough die-casting machine withstanding rough use in harsh operating environment.

High rigidity die-plates

- Highly rigid die-plates optimally designed with CAE analysis to minimize deflection reduces burr generation.
- Die-clamping force is evenly distributed over the parting surface of the die, realizing ideal casting.

Automatic lubrication unit toggle

The high-precision, high-rigidity clamp has adopted a "quantitative distribution automatic oil lubrication system". This feature further improves the reliability and durability of the system.

Injection C frame

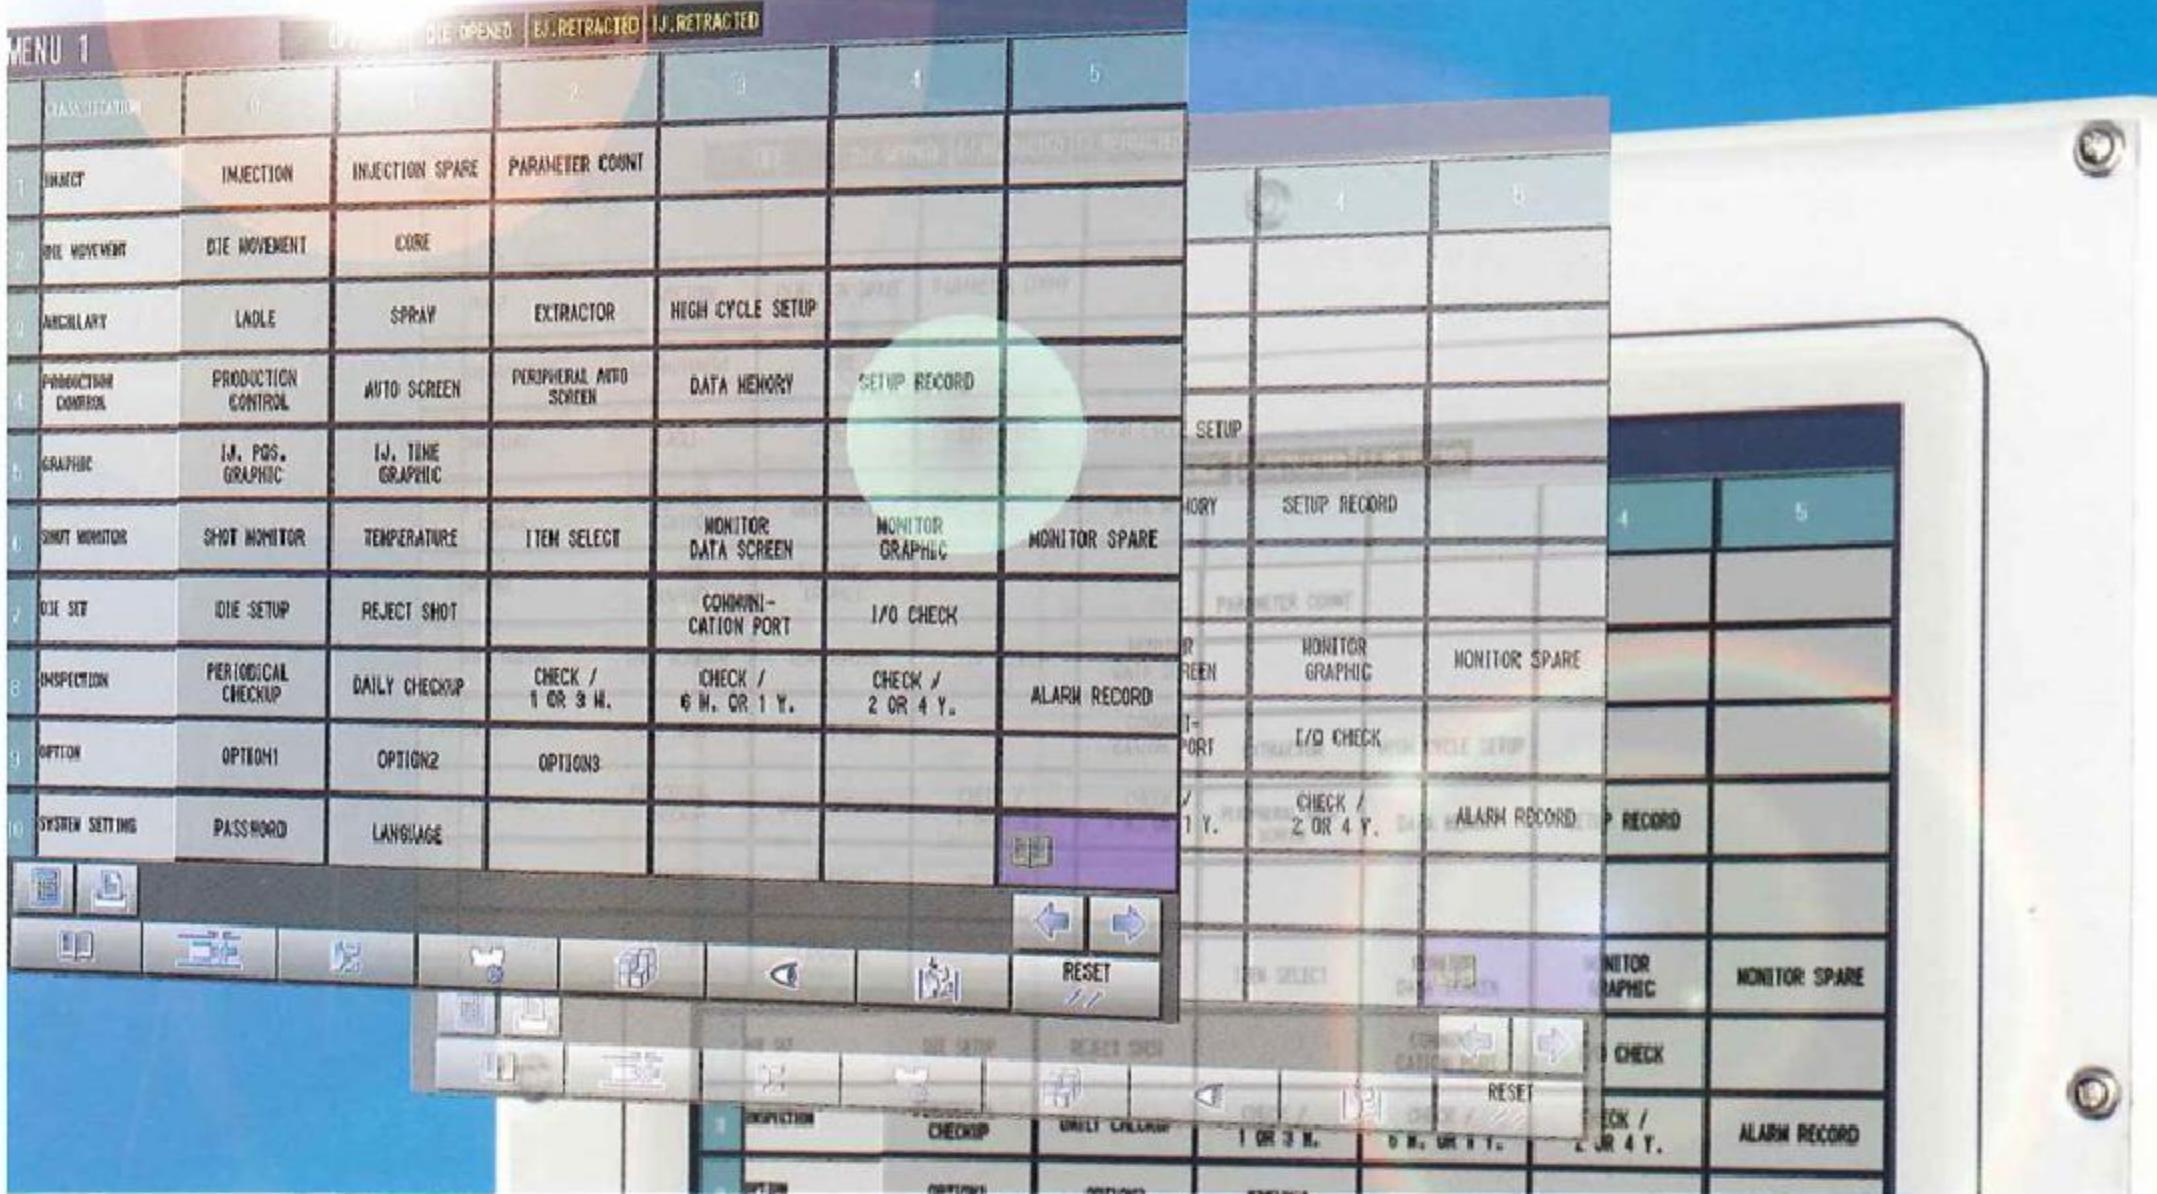

A high-strength C frame has been adopted at the injection unit. Center of the injection cylinder and the sleeve hole have been machined together to improve the reliability of the injection unit.

Control System

The latest electronic control system brings machine performance into full play.

Easy operation

Next-Generation Human-Machine Interface: SYSTEM 500

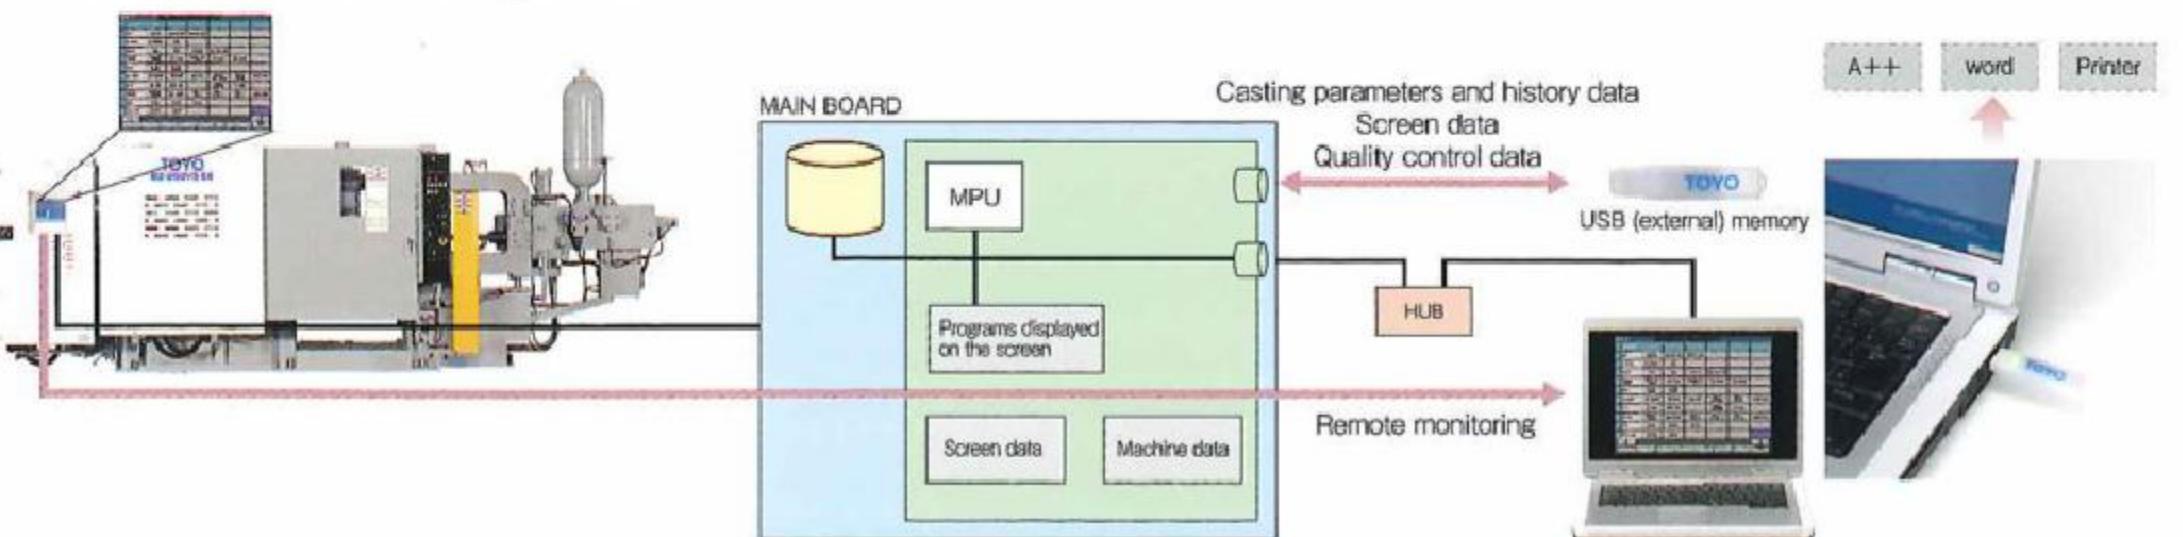

T-Station network control system brings your production control to new stage

The T-Station is TOYO's original new network control system that can remotely monitor as many as 32 die-casting machines using a server. The BD-V5 EX series has necessary software and interface for the T-Station as standard. (Software on the server side is optional.) With the T-Station, the current machine operating status

can be monitored real-time no matter where you are via the internet or a wireless LAN. SYSTEM 500 control system tremendously improves the efficiency of your production control regardless of a place or a time.

T-Station system configuration

All-in-one menu screen from which any screen can be accessed

Customer-satisfying SYSTEM 500 control

The SYSTEM 500 controller accommodates all the features that fulfill needs and wishes given from customers to our previous PLCS-12 controller.

Frustration-free, instant access to any screen

Any desired screen can be accessed directly from the main menu screen. In addition, one screen can be shifted to another much quicker than previous controller.

Screen-storing function

Maximum five screens can be stored in the internal memory. Stored screens can be called up by just touching FORWARD or BACK buttons. This function is just one of the unique features you can find only in SYSTEM 500 control.

■ SYSTEM 500 supports the overseas operations of the customers.

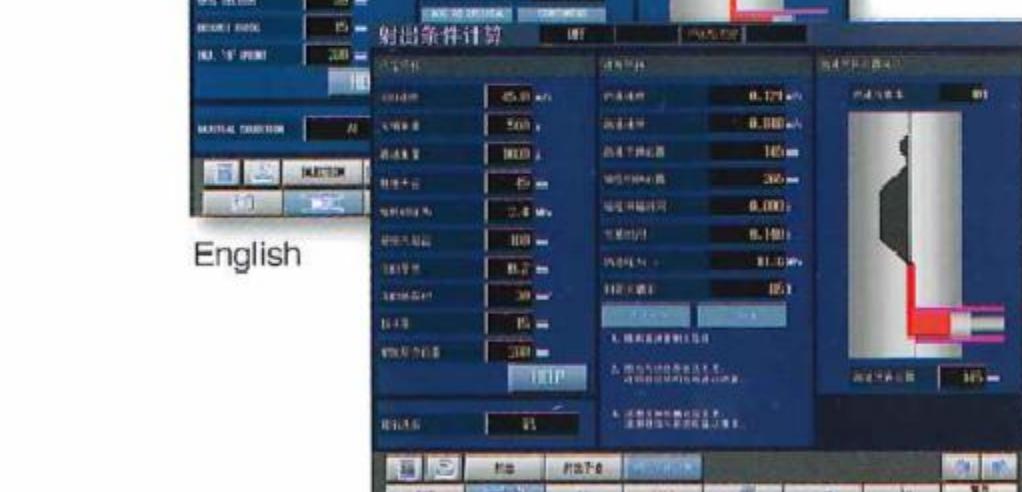

○ Language selection function (4 languages included in standard specifications)

Japanese, English, Chinese (traditional & simplified), and Korean

Parameter count screen

Korean

English

Chinese (simplified)

■ PC-touch easy entry operation

Entry with 10-key screen

The popped up screen can be dragged to a convenient place for easy entry operation.

Software Keyboard

The keyboard appears as a pop-up, allowing key inputs similar to a personal computer keyboard.

■ Security features

Password function

The SYSTEM 500 controller is provided with a 4-step security protection using respective passwords for each authority level. If an upper level screen is left unattended for a certain time, it is automatically shifted to a default level screen.

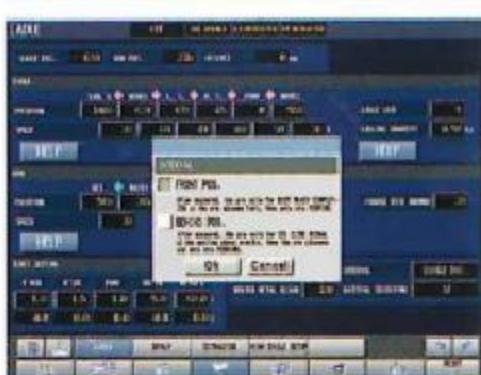

Job title	Job title example	Operation authority
Manager	Plant general manager, manager	User management and addition, password assignment
Maintenance	Maintenance staff	Model changes, board replacement semi-fixed values, environment screen
Technician	Technical staff	Casting condition changes
Operator	Operation staff	Start/stop operation, screen display only

■ Easy-to-see screen design

Ladle screen

Pops up the selection contents.

I/O monitor screen

The input and output conditions can be checked at one glance.

Enhanced flexibility in quality control management

Previous control system	New SYSTEM 500 control system
Transferring data to PC	Conditions, constants, graphs, monitor data, screen hardcopies USB memory (Toyo specified) ⇒ transferring to PC - Internal 400 type - External 400 type (USB memory) - 40 internal graphic patterns *1
Printer support	ESC/P control code support printer (option) USB printer support (Toyo specified)

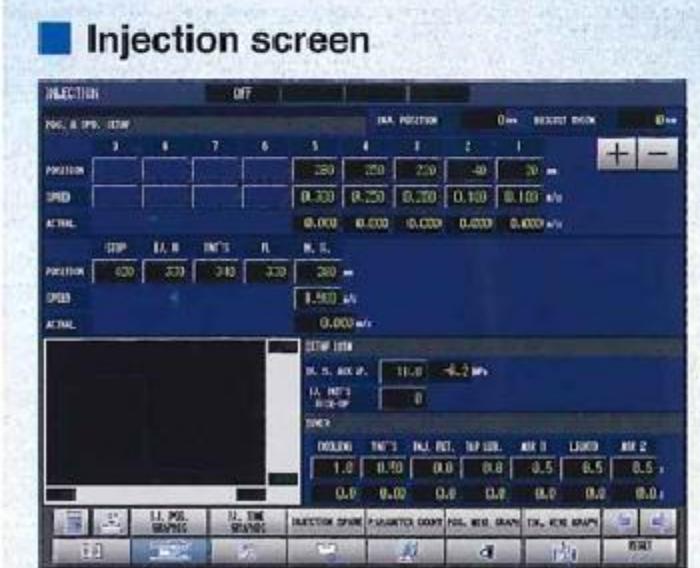

*1 The number of the graphic is limited by the number of casting condition data.

Graphic function

Easily visible, the diverse graphic functions help improve operation efficiency.

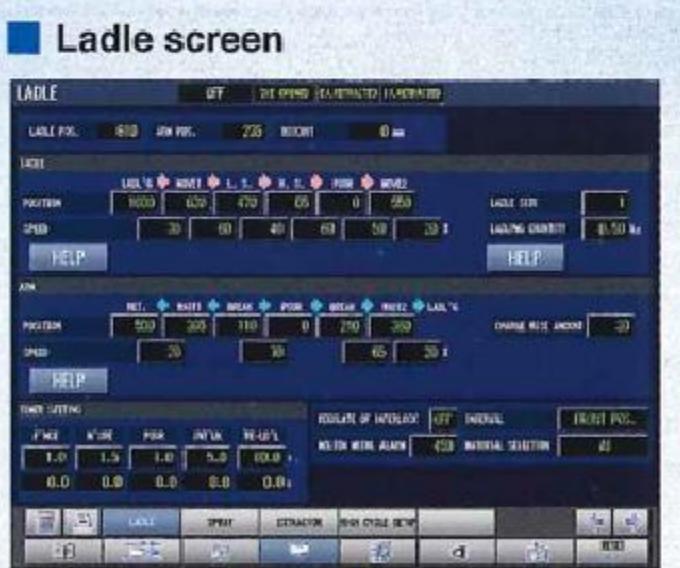

The 12.1-inch color touch panel screen guides you easily and smoothly to all operations, including the various setup, adjustment, checking, and inspection functions.

Condition Settings

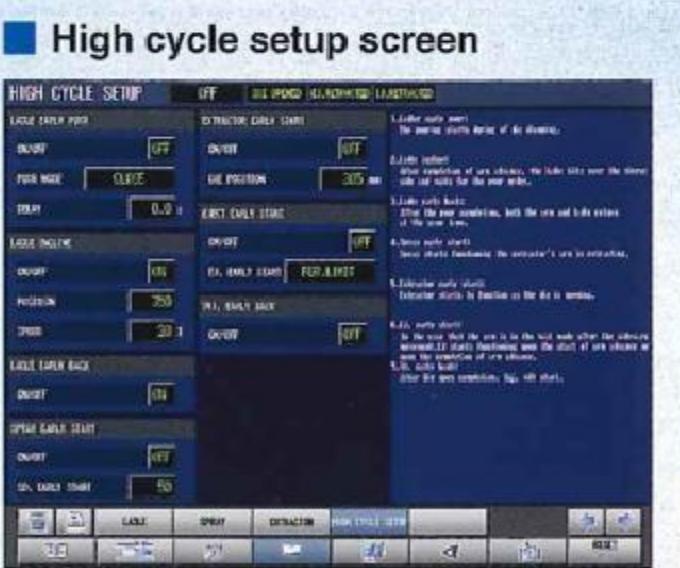

Injection screen

Sets up the injection change position, speed, and accumulator pressure.

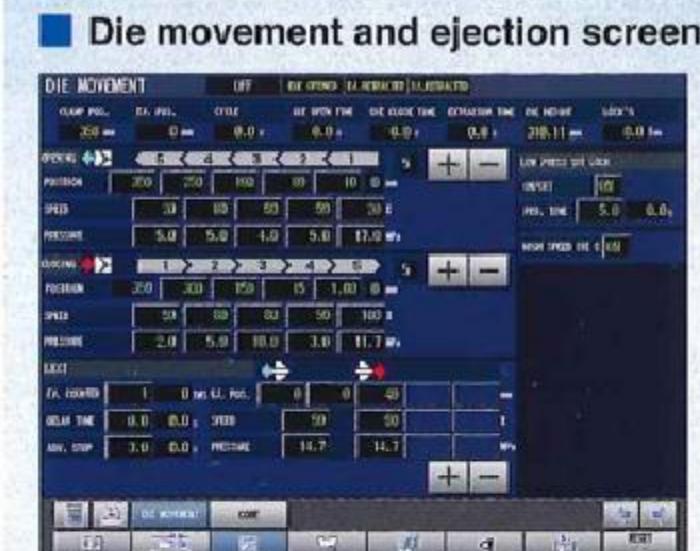

Ladle screen

Sets up the ladle arm, ladle change position, speed, and timer.

High cycle setup screen

Sets up high-cycle related functions.

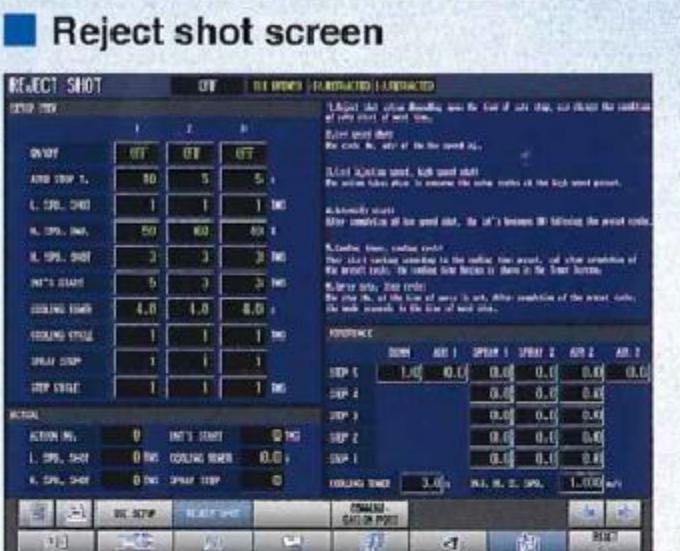

Die movement and ejection screen

Sets up the die movement and ejection change position, speed, and ejection force.

Extractor screen

Sets up the extractor mode.

Reject shot screen

Sets up the actions related to reject shots during a startup.

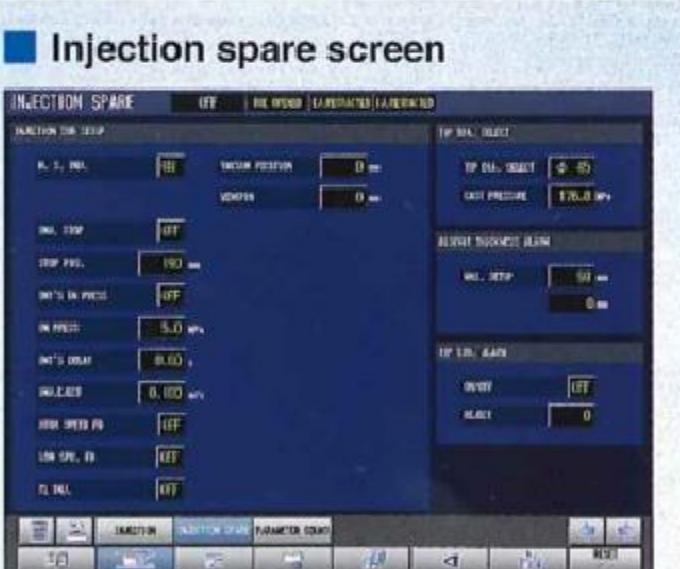

Core setup screen

Sets up the core movement sequence, speed, and pressure.

Spray screen

Sets up the spray timer and mode.

Injection spare screen

Sets up the models related to injection.

Monitoring Conditions

Shot monitor screen

Displays the measurement value for every shot.

Injection position graphic

Displays an injection graph for the horizontal axis stroke.

Monitor data screen

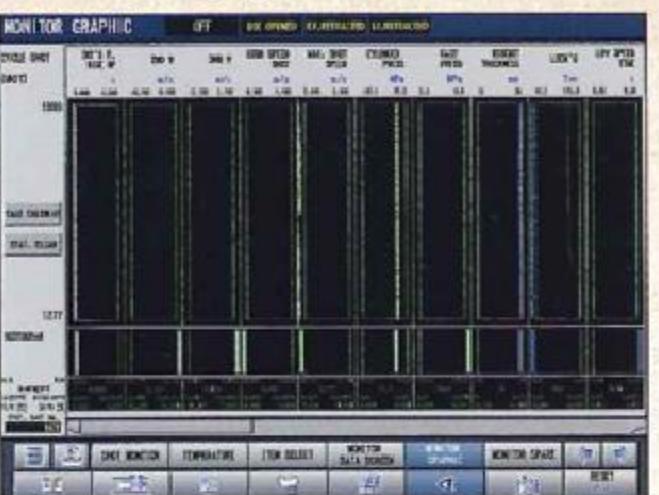

Displays data for 200 shots.

Injection time graphic

Displays an injection graph for the horizontal axis time.

Monitor graphics screen

Displays data for 200 shots on a monitor graph.

Alarm record screen

Stores alarm messages that have been created (400 pieces).

Management

Production control screen

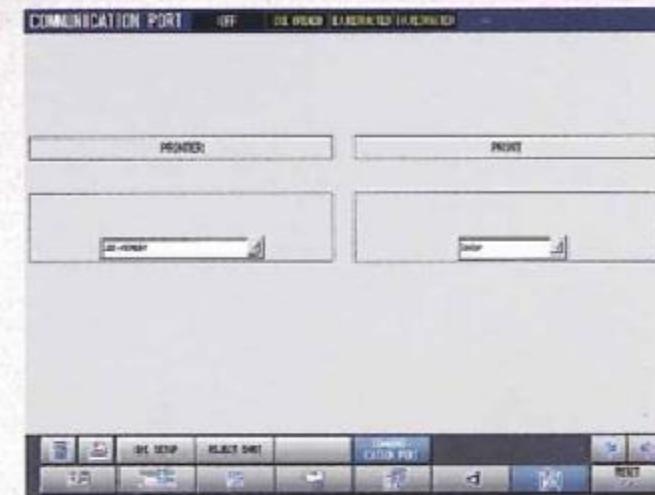

Displays a simplified production control function.

Data memory screen

Stores casting conditions for 400 dies and graphic data for 40 dies in memory.

Communication port screen

The conditions can be printed on a printer and stored on USB memory.

Condition Support

Parameter count screen

Calculates the injection parameters. The results can be checked visually.

Setup record screen

Stores 300 items of setup records in memory.

Password screen

Prevents the conditions from being changed unless a password is entered.

Line-up

Toyo's die-casting machines
meet all possible needs

BD-125V5 EX

An array of technological features are condensed into a compact body!
It's a very popular compact machine.

BD-250V5 EX

Available with a wide range of options,
it improves productivity!

BD-350V5 EX

Significant advances in ease of use,
multi-functionality, and productivity!

BD-500V5 EX

Productivity-conscious
high-performance
medium-sized machine.

*Photographs in the catalog include some optional devices.

BD-650V5 EX

Medium-sized machine boasting of high versatility.

BD-800V5 EX

Provides superior cost performance to every diecaster.

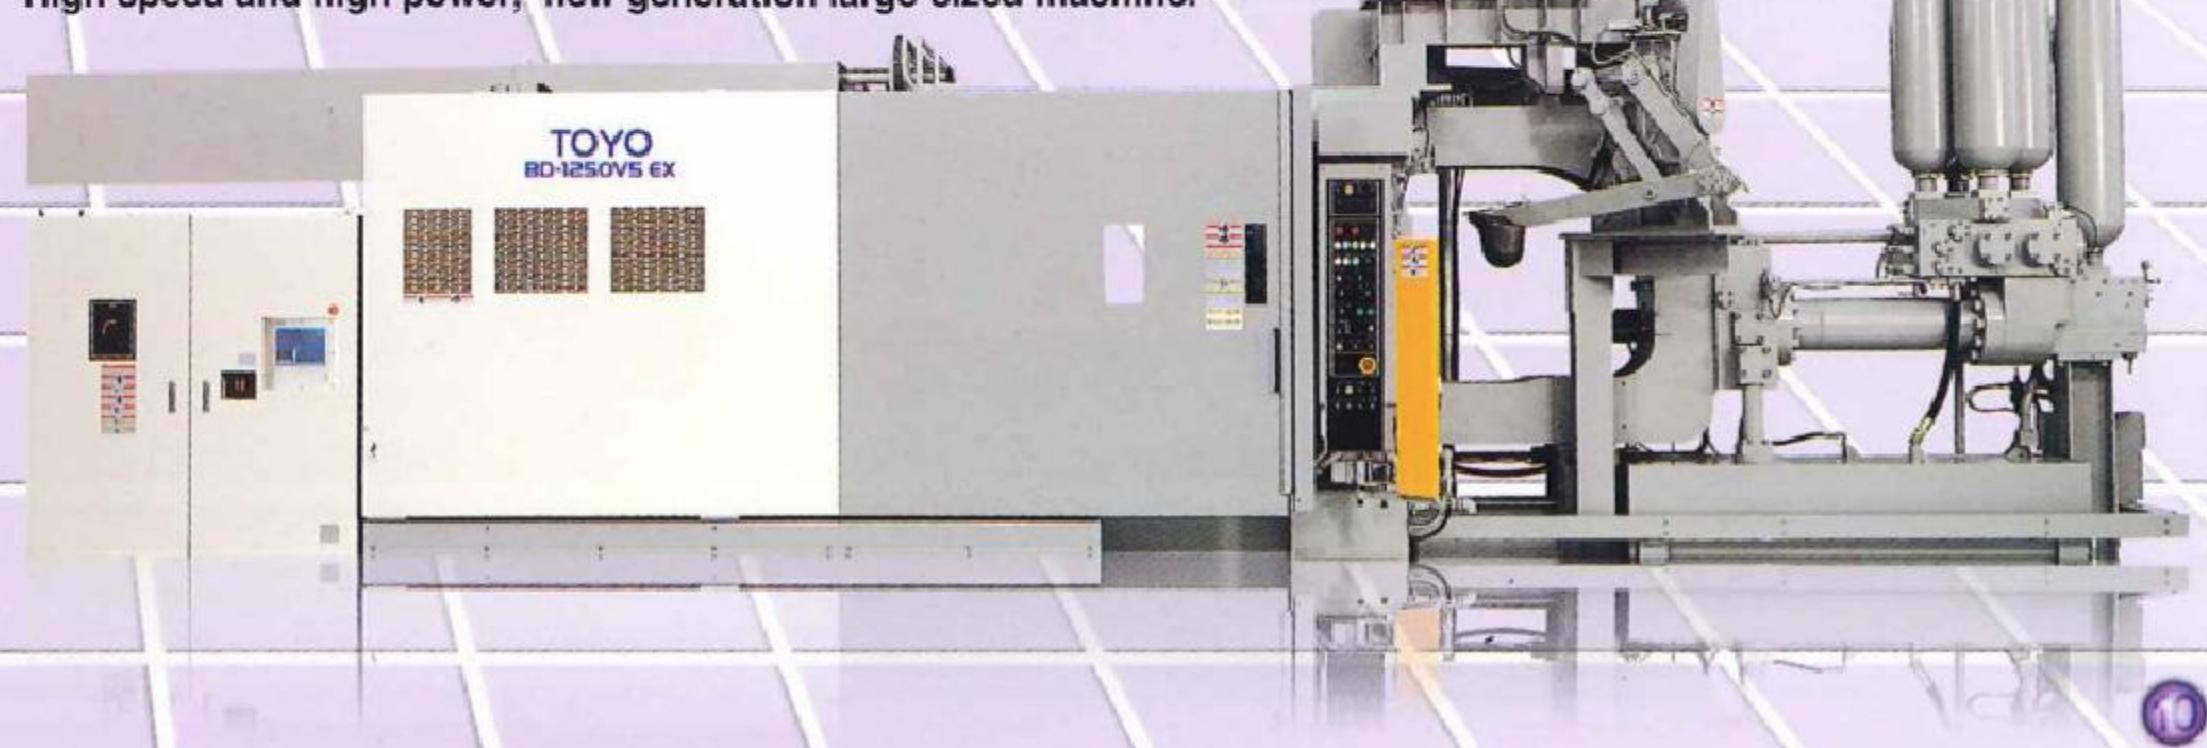

BD-900V5 EX

Top class medium-sized machine capable of handling high level casting requirements.

BD-1250V5 EX

High speed and high power, new generation large-sized machine.

Die-Casting Machine Main Specs

Performance to lead the die-casting machines of the future.

Peripheral Equipment

A robot system is controlled together with a die-casting machine.

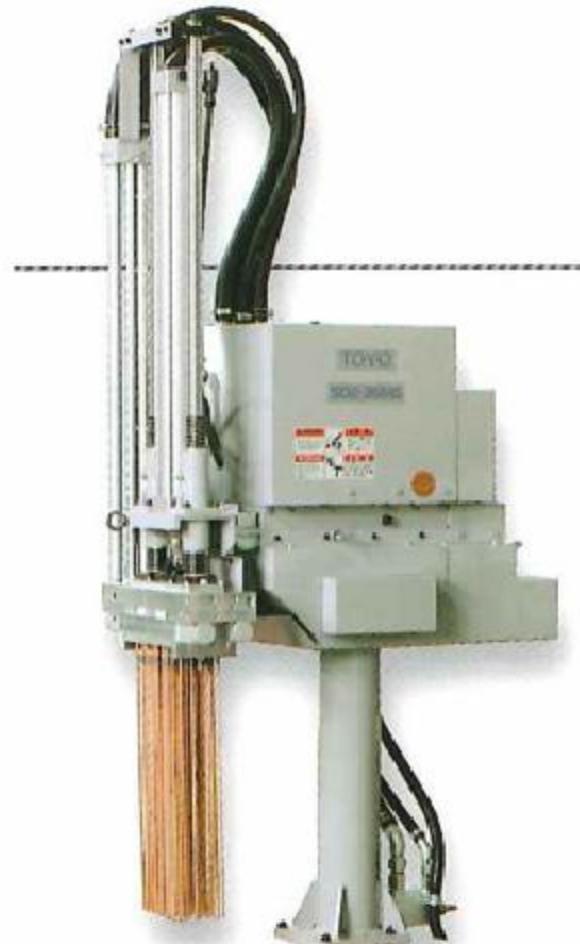

Automatic Ladle KD1-M5 series

With a linkage and full-bearing structure adopted to the driving unit, the automatic ladle can be operated smoothly with a minimum secular change. (※1)

Model		KD1-15M5	KD1-35M5	KD1-65M5	KD1-100M5	KD1-120M5
Installed die-casting machine		125V5 EX	250, 350V5 EX	500, 650V5 EX	800, 900V5 EX	1250V5 EX
Pouring capacity	kg	1.6	3.5	6.0	10.0	20.0
Pouring accuracy	%	±1 (※2)		±2 (※2)		
Ladle	kg	0.4·0.8	250:0.8·1.6·2.5 350:1.6·2.5·3.5	2.5 · 4.0 · 6.0	4.0 · 6.0 · 8.0	10.0 · 15.0 · 20.0
Min-diameter of crucible	mm	450	550	750	750	800
Arm driving motor	kW	0.75			1.5	3.7
Ladle driving motor	kW	0.4				
Control unit		Integrated control by die-casting machine control panel				
Ladling adjustment system		Digital setting				

(※1) The chain mechanism is adopted in some area of the equipment.
(※2) Under conditions without molten metal runs or ladling residues

Automatic Spray SD2-M5 series

The spray control devices are integrated in a dedicated valve box to facilitate maintenance and adjustment.

Model		SD2-15M5	SD2-35M5	SD2-65M5	SD2-80M5	SDM-120M5				
Installation die-casting machine		125V5 EX	250, 350V5 EX	500, 650V5 EX	800, 900V5 EX	1250V5 EX				
Up/down stroke	mm	600	750	950	1050	2255				
Back & forth adjustment stroke (※3)	mm	150	200	350	250	300				
Swivel angle (helper side)	°	90				—				
Spray nozzle copper pipe quantity	pieces	36	32×2	37×2		35×2				
Dedicated air blow nozzle copper pipe quantity	pieces	12	20							
Air consumption	Nl/min	2500 (※4)				3000 (※4)				
Primary air connection size/pressure		Rc1 0.5MPa minimum	Rc1.1/4 0.5MPa minimum		Rc2 0.5MPa minimum					
Primary die release agent connection size/pressure		Rc1/2 0.3~0.5MPa			Rc1 0.3~0.5MPa					
Control unit		Integrated control by die-casting machine control panel								
Spray time adjustment system		Digital setting								

(※3) Adjusted by a manual lever (※4) Measured under Toyo's spray setting conditions

Automatic Extractor TD5L-M5 series

Smooth and high cycle operation by adoption of a dedicated inverter motor for driving arm.

Model		TD5L-15M5	TD5L-35M5	TD5L-65M5	TD5L-80M5
Installation die-casting machine		125V5 EX	250, 350V5 EX	500, 650V5 EX	800, 900V5 EX
Extraction stroke	mm	1020	1400	1800	2089
Pulling stroke	mm	150	250	250	350
Pull-out force	N		490		
Clamp diameter	mm	40~60	50~80	60~95	80~120
Finger turning angle	°		90		
Product detection		Limit switch detection, standard 2 pieces			
Arm actuation	kW	0.4		—	
Air consumption	l/cycle	6.9	9.8	10	10
Primary air pressure	MPa	0.4~0.5			
Control unit		Integrated control by die-casting machine control panel
